

## Vicmarc Oval Turning Device VOD300

Oval Turning is an old art of turning, it has been practiced since the middle ages. Professor Johannes Volmer was able to create a system for oval turning using tooth belts for smooth operation. Vicmarc has re-engineered this device and simplified the operation and set up.

You are able to produce bowls, platters, picture frames, etc by using conventional tools. Built in balancing system for higher RPM turning. Infinitely Adjustable Centre Line - 360 degree movement by undoing two bolts then rotating spindle to desired centre. This fine adjustment can be done without taking bowl out of the chuck.

Standard Accessories: 1 x DVD Instructional Manual, 1 x C-Spanner, 1 x 18mm Spanner, 1 x 13mm Spanner, 1 x 7.9mm (5/16") Tommy Bar, 1 x 5mm T bar, 1 x Insert (VM90-100 1 1/4 x 8), 1 x Clamping Assembly includes clamping plate, bolt & washer
